

Progressive Ventures is hiring construction workers

- Any experienced construction workers with commercial or industrial construction experience are encouraged to apply
- We require carpenters and other tradespeople
- We also require apprentices with commercial experience

Progressive Ventures Construction is a commercial and industrial construction company with 38 years experience in Northwestern BC. We often have contracts in exciting environments such as in-stream concrete work for hydro dams, helicopter accessed construction for mineral exploration support, and complex industrial facilities like remote LNG plants or hydro line sub-stations.

We are based in Terrace BC where there is an un-surpassed outdoor lifestyle, a great community of people, affordable real estate and consistent work. If the idea of living in a place with a high quality of life appeals to you, we encourage you to apply for construction work with us. For information on what's available in the Terrace area, check out www.visitterrace.com

We offer competitive wages, stable and consistent work, a wide variety of project types, and the ability to work with some very experienced superintendants in a field that will benefit your apprenticeship or career.

Applicants must have a valid driver's license. Additional safety training and trade certifications are an asset. Wages will be negotiated based on level of experience and qualifications.
